

### What's the aim of the Confident Plan and who is it for?

The aim of the Confident Plan is to generate growth over the longer term. Investing always involves some level of risk, and movement up and down in value is to be expected.

The Confident Plan is suitable for investors who give equal importance to making gains and controlling potential losses, and are comfortable seeing movements up and down in the value to try and get good returns.

Investing should be part of a long-term savings strategy and whilst money can be withdrawn from a Wealthify Plan at any time, investing for less than 5 years is unlikely to be appropriate in a Confident Plan.

### What makes the Confident Plan different?

The example below shows a typical mix of investments in a Confident Plan, but it can hold between 45% and 70% high-risk investments (Commodities, Emerging Market Bonds, Private Equity, Shares and Property), with the remainder in low-risk investments (Bonds, Cash, and Cash Equivalents).

The chart above shows the range for the Confident Plan, which can include a minimum of 30% low risk assets and a minimum of 45% high risk assets.

### Benchmarking

The Confident Plan performance is measured against the ARC Sterling Balanced Asset PCI. The PCI is a peer group benchmark which shows how other companies' plans with a similar risk profile have performed. The indices are based on real performance numbers from hundreds of other Plans.

## CONFIDENT PLAN FACTSHEET

### Foreign currency

A Confident Plan could contain up to 50% in overseas investments which are held in a foreign currency.

Typically, the more foreign currency held in a Plan, the greater the potential risk and volatility.

### Investment Mix

This is a typical example of the mix of investments in a Confident Plan.

### Regional Mix

This is a typical example of investments by region in a Confident Plan.

The Investment Team at Wealthify review and adjust the investment and regional mix on an ongoing basis to try to optimise the performance of our Plans.
