

**What's the aim of the Cautious Plan and who is it for?**

The aim of the Cautious Plan is to achieve returns level with the Bank of England base rate (before fees). This Plan is suitable for risk-conscious investors whose focus is on stable returns across different market environments.

They are still open to taking on small amounts of risk, but their focus is more on preserving their money and preventing losses, rather than making large gains. While investing should always be part of a long-term strategy (5+ years), this Plan could be considered for a shorter time horizon, as the large proportion of cash equivalent assets should protect from market drops (although this is not guaranteed).

Investing always involves some level of risk, and up-and-down movements in value are to be expected. With the Cautious Plan, our aim is to limit the extent of these movements, but there is still a risk you may get back less than invested. Money can be withdrawn at any time.

**What makes the Cautious Plan different?**

The example below shows a typical mix of investments for a Cautious Plan. It can hold between 70% and 90% in Cash and Cash Equivalents (Money Market Funds), with the remainder in low-risk investments (Short Duration Corporate Bonds and Defensive Alternative assets).

The chart above shows the range for the Cautious Plan, which will always be invested in 100% of low-risk assets.
